

CIOB ACADEMY

Understanding Building Conservation

08 - 09 OCTOBER 2019
CITB NI, Crumlin, BT29 4SR

A 2 day course, delivered by John Edwards, designed to help you improve your decision making when working on and managing traditional buildings, including both unprotected buildings and those which are protected due to their historic significance.

£295 (+VAT) Per person
Includes refreshments

Brownlow House, Lurgan

Overview

The course is open to anyone who works with traditional buildings. With over 6 million traditional buildings and over 500,000 listed monuments in the UK, there is a considerable need for building professionals to understand the nature and practicalities of conservation. For this reason, we have developed a course looking at conservation for both residential and commercial property as well as historic monuments. In accordance with the ICOMOS (International Council On Monuments and Sites) Training and Education Guideline and the latest British Standard on conservation of historic buildings (BS 7913: 2013) the course will introduce the philosophy behind conservation before going into detail regarding the technical analysis of buildings, ensembles and sites, diagnosing issues, identifying the best building conservation solutions, working with the various stakeholders, and ultimately providing advice regarding best practice. At the end of the 2 days, you will receive a certificate of attainment from the CIOB if you pass the end of course test. Moreover, those who pass the course will be eligible for further recognition under the new CIOB Building Conservation Certification Scheme.

For more information and to make a booking:

www.ciobacademy.org/product/understanding-building-conservation/

At the end of the course, you will receive a certificate of attainment and be able to:

- Read a building or site and its different types of significance values.
- Demonstrate knowledge of historical development, and types of construction technology.
- Interpret the setting of buildings and sites.
- Identify and absorb all available sources of information relevant to the building or site being studied.
- Analyse the behaviour of buildings and sites as complex systems.
- Diagnose intrinsic and extrinsic causes of decay.
- Demonstrate inspection best practice and make intelligible reports.
- Apply UNESCO conventions and recommendations, ICOMOS and other recognized Charters, regulations and guidelines such as BS 7913: 2013.
- Make balanced judgments based on shared ethical principles.
- Recognise when advice must be sought and define the areas of need of study by different specialists.
- Advise on optimum maintenance strategies and management policies for the care of historic sites.
- Work in multi-disciplinary groups to resolve conflicts and to develop conservation strategies.

John Edwards

The course will be delivered by John Edwards, MA, DipBldgCons, CEnc, FCIQB, FRICS, IHBC who is also the CIOB's lead assessor on the CIOB's Conservation Certification Scheme. John is an expert practitioner, formerly of English Heritage and Cadw and is the lead author of BS 7913: 2013: Guide to the Conservation of Historic Buildings.
