

IHBC SE Branch CPD Event

No longer just hot air: Updates in climate change policy, retrofit and renewable energy

**East Sussex College Training Hub, 3A Hampden Retail Park,
Eastbourne, BN23 6QU**

Friday 1st November 2024: 09.00 - 17.00

Historic, traditionally constructed buildings present amazing opportunities to reduce energy use and take advantage of their low embodied carbon. But these buildings can be vulnerable to inappropriate retrofit measures. In the worst cases these can lead to the deterioration of the building's structure and fabric, increasing heat loss through damp, mould and decay.

This invaluable and timely training course highlights the issues and covers the most recent government and Historic England guidance, including the new editions of PAS 2030 and PAS 2035, which give updated guidance for traditional and protected buildings

Cost, including the buffet lunch: £40 IHBC members and £50 for non-members, £15 to IHBC Students/Unwaged. Bookings can be made via [TicketSource](#).

Joining instructions will be issued nearer the date and CPD certificates can be provided on request.

IHBC SE Branch CPD Event

No longer just hot air: Updates in climate change policy, retrofit and renewable energy

East Sussex College's leading edge ESC Training Hub is one of five new decarbonisation academies across Sussex supporting the development of skills in retrofitting and green energy installation located in Hampden Retail Park, Eastbourne. The Hub provides training in renewable energy and retrofit in collaboration with Award winning Renewable energy company OHM a pioneering advocate of accelerating the industry and the nation's move towards net zero.

AGENDA

- 9:00** Teas and Coffee – Networking – Browse displays of Renewable systems
- 9:30** Introduction and Overview – Jo Saady
- 9:40** Retrofit for the Future Session 1: Overview of IHBC guidance - John Edwards
- 10:10** Carbon pledge certification and the importance of community engagement - Ned Saunders, East Sussex College Training Hub
- 10:30** Policy and Guidance Background—NPPF Review and HEAN 18 – Historic England
- 11:00** Refreshment Break
- 11:15** OHM Energy - Jason Lindfield & Michael Wishart
- 12:00** Lunch/networking
- 12:45** Retrofit for the Future Session 2 - John Edwards
- 14:30** Break
- 15:00** Retrofit for the Future Session 3 - John Edwards
- 16:00** Q&A and discussion
- 17:00** End
