

IHBC Annual General Meeting (AGM)

3 December 2020, 6.00pm on, with optional pre-AGM welcomes and updates from 5.30pm, including a filmed introduction by Griff Rhys Jones

TECHNICAL PREPARATION

Different web services, platforms, technical infrastructure and standards mean any webinar features and user options can vary significantly. In general, the more mobile the technology, the more limited the delegate interaction. Checking out in advance the advice below and the systems you will use will help maximise your IHBC AGM 2020 experience!

Platform Guidance: [Gotowebinar](#)

The IHBC's AGM 2020 platform is [Gotowebinar](#). The service has a useful list of [FAQs](#) for problem solving, so in advance of any School sessions you can usefully at least:

- See how to [Join a webinar](#) and what to expect
- Check out the video for [delegates](#)
- See the [FAQs](#), and check out linked support and training (some accessed via the free trial)
- Understand the [experience](#), and be sure to use the links for more detail

Wifi/Broadband/Mobile technology

Check out the connections you will use on the day. You can assess your wifi/broadband service connections using [Speedtest](#), or a comparable national service. You should trial it using the technology you intend to use, and at corresponding times of day if possible. If the service is poor it may be better to use your mobile service and/or a smartphone.
